Water Crises in Iran

Hadi is a Ph.D. candidate at the Irrigation Engineering Department, Ahwaz University, Iran. He is also a Researcher at Iran's Agricultural Research, Education and Extension Organization. Hadi has B.S. and M.S. degrees in Irrigation Engineering and has supervised several projects, taught many courses, and published journal papers and text books in the same field. The focus of his research is on improving agricultural water management to conserve the quantity and quality of limited water resources in Iran.

Hadi is currently a visiting scholar at the BAE department, working with Dr. Taghvaeian on the performance of irrigated wheat.
