What do you say?

Research Specialist with the Oklahoma Water Resources Center

The Oklahoma Water Resources Center is looking for a new team member to assist with development, implementation, and administration of projects and programs addressing critical water issues in Oklahoma and beyond.

If you have:

- a Ph.D., M.S. or a Bachelor's (with three years' experience) degree in agricultural science, engineering, environmental science, water management, or a closely related field
- excellent interpersonal, verbal, and written communication and public speaking skills, good computer skills, superior organizational skills, and a working knowledge of monitoring systems and experimental design
- the ability to travel as necessary for field data collection and meetings with stakeholders

you might be just the person we are looking for!

The successful candidate will, among other duties:

- assess statewide, regional, and national needs, issues, and trends in water resources
- plan and develop grant proposals to obtain external funding
- implement and manage research and education projects
- assist with data collection, analysis, and interpretation activities to support the Center's efforts and research activities
- conduct education and outreach activities
- work closely with the Center's program coordinator to compile reports, prepare results for publication, and develop project Web sites.
