The Oklahoma Water Resources Center within the Division of Agricultural Sciences and Natural Resources (DASNR) focuses efforts for sustaining Oklahoma’s water supply, which is crucial to our quality of life, the state’s growing economy, and the health of our environment.

DASNR has more investment in water research, education, and public service than any other entity in Oklahoma.

Oklahoma Water Resources Center

- Our faculty and staff serve OSU’S land-grant mission of extension, research, and teaching.
- Extension staff are present in every Oklahoma county to provide citizens with services and information about water and a variety of other topics.
- Eighteen field research stations positioned across Oklahoma conduct research on numerous water-related issues.
- Faculty collaborate within and among departments and with other universities around the nation.
- Partnerships with state, federal, tribal and non-profit agencies support this program.
- The Center provides funding for water resource projects to any university in Oklahoma.
- Support for the Center is provided by the Thomas E. Berry Professorship in Integrated Water Research and Management.
